Protecting Companies with +800M Customers Worldwide

Financial crime moves fast and consumers expect a seamless experience. But you can't solve tomorrow's problems using yesterday's technology; on-premise platform deployments don't cut it in today's digital-first world. However, managing your own cloud is costly, inefficient, and difficult to scale. It's time to step up your game against fraud and money laundering.

Accelerate Time to Value

Feedzai as a Service runs on a technology platform that is architected to operate securely while ensuring fast, efficient, and reliable processing of data. Following a defense in depth approach, Feedzai has created a cloud infrastructure that has security controls implemented at every layer, protecting both the network and the data.

Our security, operations, and product teams work closely with your security and compliance teams to not only protect transactions and customers, but accelerate time to value.

Feedzai as a Service customers realize:

50% reduction in time to value

Real-time provisioning

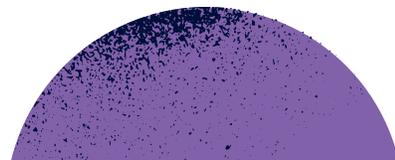

2.7x faster ROI vs. on-prem deployments

4x faster resolution times

Automatic software updates provide instant access to new features

Stay Ahead of Financial Crime with the Latest Risk Prevention Tools

Feedzai as a Service elevates your fraud and money laundering prevention technology to its full potential. This secure cloud-based software-as-a-service offering provides you with:

Instant Access and Total Control

Flexible data ingestion and consumption within a system that can be tuned to adjust and scale.

Optimized, Flexible Infrastructure

Adjust infrastructure based on market and business needs. You can perform complete isolation on applicational and storage infrastructure, bring your own encryption key, and get easy, automated access to auditing logs.

Scalability

Strategic distribution of resources achieve greater efficiencies while minimizing downtime and latency.

24/7 Business Meaningful Service Levels

Over 99.99% of the requests to Feedzai as a Service APIs were successfully served in agreed-upon timeframes in 2020.

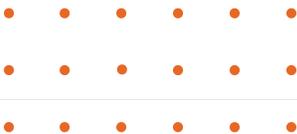

Next-Level Security

Security that goes beyond main baseline standards including PCI-DSS Level 1, ISO 27001, and SOC2 certifications.

Confident Business Decisions

A team of Data Scientists and Fraud Analysts proactively monitors the quality of the system's decisions to help you make confident decisions.

Awards and Recognition

Feedzai ranked #15 on the Forbes list of most promising AI companies.

Feedzai named best transaction fraud monitoring and decisioning innovation.

Feedzai bestowd Top 21 RegTech Innovation Award
