

# Fraud Detection & Response Platform

Online fraud prevention solutions traditionally focus on detection and notifications that alert fraud teams or transaction monitoring systems of the risks associated with a particular user at a given point in time. But these solutions can leave fraud teams overwhelmed by numerous alerts.

Feedzai ranked #15 on the Forbes list of most promising AI companies.

Feedzai named best-in-class fraud and AML machine learning platform vendor

Feedzai bestowed Top 21 RegTech Innovation Award

The Fraud Detection and Response (FDR) Platform from Revelock, a Feedzai company, works by stopping active threats like malware and phishing attacks, as well as bad actors already operating within your organization. The FDR platform's defensive capabilities deliver a silent user experience that continuously protects customers while preventing them from being interrupted by bad actors.

## Key Features include:

### Active Defense

Detects and defeats Remote Access Trojans (RATs) designed to hijack user sessions or take over accounts.

### Preemptive Defense

Allows fraud analysts to regain control by uncovering bad actors within an organization by visualizing links to victims and mule accounts.

### BionicID™

Built using hybrid AI, this technology reviews thousands of parameters and behavioral biometrics to verify users in just two interactions.

# Key Benefits include:

## Know Your User

by implementing an approach to precisely identifying users that centers around answering the question "are you really you?"

## Enhance Brand Trust

by proactively securing end user accounts and stopping account takeovers, new account fraud, and CNP fraud.

## Reduce Fraud

by detecting and responding to any manipulation or impersonation attack.

## Improve Security

by stopping bad actors operating from outside or inside your organization, from creating fraudulent new accounts, or taking over existing ones.

## Prevent Account Takeover

by immediately taking action to stop fraud anytime a user anomaly is detected.

## Streamline the Customer Experience

by silently and continuously verifying user BionicID™ minimizing needless step-up verification.

## Reduce Costs

by minimizing false alerts, and regulatory fines resulting from compromised customer data.

## Take Full Control

by configuring and automatically responding to malware, phishing, RATs, and other attack types.
