

# FEEDZAI MULTI-TENANCY

## BALANCING RISK WITH CUSTOMER EXPERIENCE

Feedzai's solution features a multi-tenant architecture which provides acquirers with the ability to efficiently onboard merchants, monitor merchants, and provide transactional scoring all from one platform with a more sophisticated, real-time approach. Acquirers can meet regulatory compliance obligations and resolve investigations, all while protecting the customer experience.

## FEDERATED MACHINE LEARNING

With the benefit of the entire network of merchants, Feedzai can apply collective knowledge by extracting insights from each merchant and transforming these insights into intelligence that can be used across the entire network. The platform examines critical connections between behaviors across merchants to proactively protect each merchant with actionable insights by using alerts and escalations triggered by suspicious activities in real time.

## STREAMLINED OPERATIONS

From a unified administrative portal, acquirers can conduct complete merchant identity authentication to streamline and accelerate onboarding, monitoring, and transaction scoring for all merchants by using more intelligent risk models. With a one-stop shop solution, acquirers can easily push changes out to all merchants and now be considered as valued players in the processing ecosystem.

FEEDZAI'S PLATFORM PROVIDES LEADING EDGE DATA SCIENCE TO ONE OF THE WORLD'S TOP 5 PROCESSORS.

**\$50B** ANNUAL SCORING VOLUME

**380** CART CHECKOUTS PER MINUTE

**100K** MERCHANTS IN PORTFOLIO

### SMART AND SCALABLE RISK MODELING

Rules and lists combined with machine learning models address known and unknown fraud patterns. With scenario optimization, acquirers build, test and deploy risk models with greater predictability, enabling faster fraud detection.

### INCREASED OPERATIONAL EFFICIENCY

With a full service case management system, acquirers can assign queues specific to each merchant, providing an efficient solution for transaction review, decreasing operational costs with streamlined case reviews and better resource allocation.

### ENSURED PRIVACY AND PROTECTION

While insights are shared, the privacy of data for each merchant is ensured because specific data from each merchant is not shared. The system extracts patterns while protecting each merchant's data and with a fully compliant solution.
