

# FRAUD MANAGEMENT FOR ACQUIRERS

Empower your merchants without compromising security.

Intense competition from peers and new entrants. Declining margins. Increased regulation. Merchant attrition. Acquirers are responding to these shifting dynamics by expanding into new geographies and merchant segments, and by offering new services beyond payment processing, which has become a commodity. With this expansion comes an increase in the risk profile of acquirers' merchant portfolios.

## How can acquirers fight fraud in a way that supports expansion and innovation?

One way is to invest in the right technology, as risk in acquirers' increasingly complex businesses can no longer be managed with legacy infrastructure and manual interventions.

Feedzai prevents and mitigates even the most difficult-to-catch fraud with a powerful, scalable, end-to-end platform—so you can focus on increasing merchant satisfaction.

## SAVE MONEY, MAXIMIZE EFFICIENCY

Get fraud out of the way to focus on increasing merchant satisfaction.

### Reduce Fraud Losses

# 66%

of fraudulent dollar volume detected\*

### Streamline Your Efforts

# 0.42%

alert rate\*

## Powerful Technology to Keep You and Your Merchants Safe From Fraud

The only enterprise fraud solution to automatically incorporate all your data and operationalize it. Prevent and mitigate even the most obscure fraud events, at scale, in real time.

### Leverage Hypergranular Insights

Process hundreds of millions of Segment of One™ profiles in real time, across your entire merchant network. Understand precise entity behavior at any point in time. Easily spot and stop fraudulent behavior.

### Rapidly Iterate, Even in Production

Iterate on hundreds of risk models and instantaneously deploy them to production. With AutoML and Hyperparameter Tuning, new models can now be optimized and trained in a day, not in weeks.

### Operationalize All Your Data

Ingest huge volumes of data, in any format, from any source, from all your merchants for a 360 degree view of your fraud exposure. Human-readable Whitebox Explanations™ support your decisions and keep you compliant.

## Feedzai Prevents and Mitigates the Worst Fraud So You Can Focus on Your Business

### Merchant Onboarding

Address merchant risks across multiple vectors and deliver the power of artificial intelligence to create a better experience for good merchants, while keeping away fraudulent ones.

### Transaction Fraud

Score transactions for credit, debit, ATM and prepaid cards (and digital wallets) for card-present and card-not-present payments. Score ACH, wire and peer-to-peer transactions. PCI-compliant payment validation and transaction verification offer real-time risk scoring while reducing false declines.

### Merchant Monitoring

Track merchant activity in real time. Continuously assess compliance risk and exposure with alerts and escalations triggered by suspicious activities by using data across all merchant dimensions.

“Credorax is proud to partner with Feedzai to provide AI solutions that better safeguard merchants and their customers. We dedicate significant resources to help solve complex issues such as fraud and are confident that, working together, we will continue to fuel growth in the digital economy.”

- Igal Rotem, CEO of Credorax
