

One Platform to Manage Financial Crime

Every day, Feedzai's risk management platform scores trillions of dollars of transactions to protect the world's largest companies. Feedzai operationalizes machine learning and mitigates even the most complex financial crime.

Our Solutions

Transaction Fraud

Monitor all transactions throughout your entire business in real time. Prevent and mitigate even the most complex fraud occurrences with accuracy and scalability.

Anti-Money Laundering

Utilize powerful machine learning technology to detect complex money laundering typologies and visualize hidden relationships among transactions. Ensure complete transparency to alleviate regulatory scrutiny.

Account Opening

Create customized user journeys based on an applicant's risk assessment for personalized application processes. Acquire more customers in real time with zero friction.

Protects over 200M customers in 190+ countries

Processes trillions of dollars annually

Billions of dollars saved from fraudulent activity annually
